and groans of man. Knowledge lightens the cares of life.

He who says that he is afflicted with nasal catarrh is afflicted with compound

ignorance, i. e., he is ignorant of the subject, and ignorant of his ignorance. The so-called nasal catarrn is a disease caused by billions of bacilli, and their ordere murders their victim, as

shall quickly prove, should not death occur from some other cause. Bacilli present themselves in four orms. The first is a plain, dark, round mass; the second, an oval, with a dark point at each extremity; the third, an oblong disc with dark points,

as in the second; and, fourth, two dark points, united by a film and strikingly resembling a dumb bell. Thousands of bacilli might swim side by side through the eye of a small needle, and it would require 187;000,-000 of them to weigh a single grain.

All the ordue from the bowels of these bacilli, except what the victim blows out of his nose, defluxes into his throat, thus sealing up the smaller bronchial tubes and often obstructing those of considerable size. The moment air is shut off from a cluster of air cells, the capillaries of

those cells become gored with imper-fectly decarbonized blood, and from that moment bacilii ordure has evolved asthma or tubercult consumption, the patient having no warning of his death, beyond the presence of bacilli orders which he hawks out at times.

Now, reader, if you are a victim of what is illogically termed nasal catarrh, come and have the bacilli removed, which has never been accomplished by

any person except the writer.

How long does it take to remove from the nose the billions of bacilli? In all ordinary cases, not a second over twenty minutes. After the removal of these billions of bacilli, what is to be the result? The patient stops blowing, bawking, hemming and spitting bacilli ordure, which is proof that his nose, throat, bronchial tubes and lungs are no longer used as cesspools by bacilli

There is no greater enjoyment of nature's triumphs, and no greater safe-guard against noxious things of all

kinds, than a healthy nose.
